Mold Rated		1/2"	4'x8', 9', 10', 12'

PANEL REY®

Drywall Solutions

Ultralight Compound

This compound is 20% lighter than Super Light Compound. It has been designed to prevent cracking and reduce the shrinking that naturally occurs when the compound is dry and loses water as a result of evaporation.

Super Light Compound

A 20% lighter compound than the conventional ones with an exceptional finish. Furthermore, it is easier to blend and apply, leaving a smooth surface. Use in interiors only.

Standard Compound

The most outstanding product, it features excellent characteristics for the paper tape pasting as well as for covering metal edges and board edge details. It can be used in texture cracking repairs. It has very good adherence and resistance and is used for interiors.

Maximo Multiuse Compound

Use for jointing, retouching, edging details, and repairs, it incorporates high quality characteristics for good paper tape pasting. It is recommended for recovering or use for texturing. It is used for interiors.

Joint Tape

Panel Rey paper tape is made with cellulose, it is used for reinforcing joints in gypsum drywall interiors. It is also recommended for joint treatment for interior drywall boards.

Metal Studs and Tracks

In heavy and light gauges widths:
1 5/8"
2 1/2"
3 5/8"
6"
8"
